

**Ohio Department of Transportation  
Office of Traffic Engineering  
October 20, 2006**

**To Holders of the ODOT Traffic Engineering Manual (TEM), the Sign Design Manual (SDM) and the OTE Standard Construction Drawings (SCDs):**

**As of October 20, 2006, the Traffic Engineering Manual (TEM) and the Sign Design Manual (SDM), Section 295-2 of the TEM but published separately, have been revised.** This revision involves Parts 3 (Markings), 4 (Traffic Signals), 6 (Temporary Traffic Control), 8 (Railroad-Highway Grade Crossings) and 12 (Miscellaneous) of the TEM, as well as the Regulatory Chapter and Appendices A and C of the SDM.

**As of October 20, 2006, three Traffic Standard Construction Drawings (SCDs) have also been revised.** This revision involves only minor revisions in MT drawings issued September 5, 2006.

The updated publications and the separate TEM, SDM and SCD revision packages are available from the links below, the ODOT Design Reference Resource Center (<http://www.dot.state.oh.us/drrc/>), or from the Office of Traffic Engineering's Home Page (<http://www.dot.state.oh.us/traffic/>), using the Publications/Documents link. Each revision package includes a detailed Revision Log.

**The TEM and SDM Revision packages are set up to print double-sided sheets.** TEM Part 12 is being replaced completely; however, the other TEM and SDM revisions involve individual sheets or groups of pages. The pages should be printed and inserted into your manual by page number (or sign code number).

**The SCD Revision package is set up to print single-sided.** The individual drawings are arranged by number.

**Per ODOT policy, paper copies of the publications are no longer distributed to all holders. Revisions will only be available via the web pages noted above.**

For questions, comments, or concerns please contact either:
