

TRAFFIC ACADEMY

TESTING POLICY

ODOT's consultant training program includes testing procedures that requires all class attendees to successfully pass an exam in order to receive certification of completion. The ultimate goal of instituting testing is to enable ODOT to hire experienced, qualified consultants to perform work on transportation projects.

At the end of all Traffic Academy classes, a test will be given on course material covered. Tests will be multiple choice. It is advisable that students bring a calculator for use in taking the test.

Students must have an 80% to pass the test. The Signing and Markings test is composed of two parts. In order to successfully pass the test, an 80% is required on both portions individually.

Attendance and successfully passing the class exam are mandatory to receive a certificate at the end of the class.

NOTICE

Any student requiring a reasonable accommodation during training (i.e. – audio, visual or mobile) should contact Dushon Johnson prior to the course date so that the Office of Traffic Engineering can make the appropriate arrangements.
